PAINT DECORATING IDEAS FOR SMALL APARTMENTS

Paint can make a small unit look larger by the use of light warm colours that let the “sun shine from within.” Avoid using dark colours on large wall spaces. The use of the same colour throughout the room also increases visual space. If one large room must double for two purposes, use two variations of the same colour to designate

areas. The room will subtly appear like two spaces.

Paint the ceilings a lighter shade of the wall colour, and where there are pipes, radiators or air vents paint them the same colour as the walls, then they become less noticeable.
